Dear Customer:

You have purchased the finest ironing board cover set available. Used correctly, it will give you a long life of trouble free, time saving ironing. It will save energy and prolong the life of your garments.

This cover is woven with Owens-Corning Fiberglass yarn and is guaranteed never to burn. It is a weave used for fire fighters, race car drivers and astronauts protective clothing. It reflects approximately 95% of the heat placed on it, making it possible with a MEDIUM heat setting (either steam or dry) to iron all fabric-linen, cotton, silk, wool and synthetics. Place buttons, snaps, zippers, needlework and fabric with nap right side facing down and iron the back side. The nap, hardware or needlework sink into the super cushion allowing the iron to glide easily, and perfectly iron both sides at once.

Notice to quilters! Wonderful for pressing block steams easily and perfectly. Avoid the imprint from the seam allowance and protect the fabric from excessive heat using the Medium setting.

Some synthetic fibers, especially polyester, may act differently than natural ones, If slipping problems occur, a piece of cotton muslin placed over the board, or the "Easy Grip Cotton Sleeve Kit" place on the board, will eliminate the problem.

Wash the cover by hand and drip dry--or simply use a damp sponge right on the board, to clean or prevent spray starch build-up.

The iron caddy helps to prevent an iron from slipping or falling. An iron on Medium heat can be left on for a prolonged period without danger of burning or melting.

The cover is reversible and the heat reflective properties are the same on either side.

When ordering specify size and shape.

No.	Size	Price	Tax*	Total
_____	13"-15" x 54" Standard	42.95		
_____	15"-16"x 54" X-Wide-board	49.95
